## PROFESSIONAL EXPERIENCE

### UI / UX Designer

Brainblurb Venture Studio . Alkmaar NL . 10/22 - Present

- Collaborated with software developer to produce working prototypes of apps and websites based on user research.
- Built apps and websites from scratch based off of user research, user testing, wireframes, branding guides and market trends.
- Established asset library, branding guidelines and developed user tests .

### Freelance Graphic Design / UI Design

Self Employed . Portland USA / Alkmaar NL . 07/13 - present

- Delivered creative solutions to enhance projects and business identities for companies such as Apex and their unique fitness model approach.
- Reworked branding guidelines for clients including logos, color selection and mock ups.
- Using digital and traditional illustration skills to develop asset libraries, bring about motivation and curate some inspiration.

### Visual Designer

Creative Adventure Concepts . Remote . 11/19 - present

- Created the elements, subject matter and style guides to build the proper imagery for healthcare installations.
- Using graphic design and illustration techniques to bring about the artistic styles and themes to establish better patient experience.
- Completed design duties, built digital asset libraries and print ready files.

## PROJECTS

### App for Communication

[See Project](#)

Creative Adventure Concepts App . 9/22

Created an app that is currently in development to facilitate the bridge between CAC and the client.

- Imagined the user interface design which includes user flows, wireframes, prototyping and polished interface.
- Performed user testing to ensure the clients needs are met using the app to become a better bridge of communication for large projects.

### UI Immersion Project

[See Project](#)

Bike Breeze App . 10/21

Designed a list app for cyclists that helps the user develop custom lists specifically for all types of bike rides.

- Developed the UX parameters including user personas, user testing, Jobs To Be Done and MVP.
- Followed through with UI design from scratch into a fully functional app mock-up ranging from low to hi-fidelity wireframes.
